

Founded in 2004 in BioCity, Nottingham

Sygnature Discovery provides value-adding integrated or single-discipline drug discovery support to pharma, biotech, venture firms and NFP organisations offering:

- Truly co-located and fully-integrated, discipline-based services
- Medicinal and computational chemistry, bioscience including protein sciences, HTS and biophysics, DMPK, *in vivo* pharmacology and project management

With more than **700** staff on four sites, the Sygnature Discovery team includes:

220

medicinal chemists

210

in vitro bioscientists / protein crystallographers

53

nationalities accessing the best global talent

47

in vivo experts

23

computational chemists and informaticians

>80%

of our chemistry scientists have PhDs

All fielding considerable pharmaceutical industry R&D experience

Our expertise in drug research covers therapeutic areas such as oncology, inflammation and immunology, neuroscience and metabolic diseases as well as respiratory, infectious and fibrotic diseases.

Sygnature Discovery has a strong track record in drug discovery including:

>40

Preclinical Compounds

22

Clinical Compounds

>160

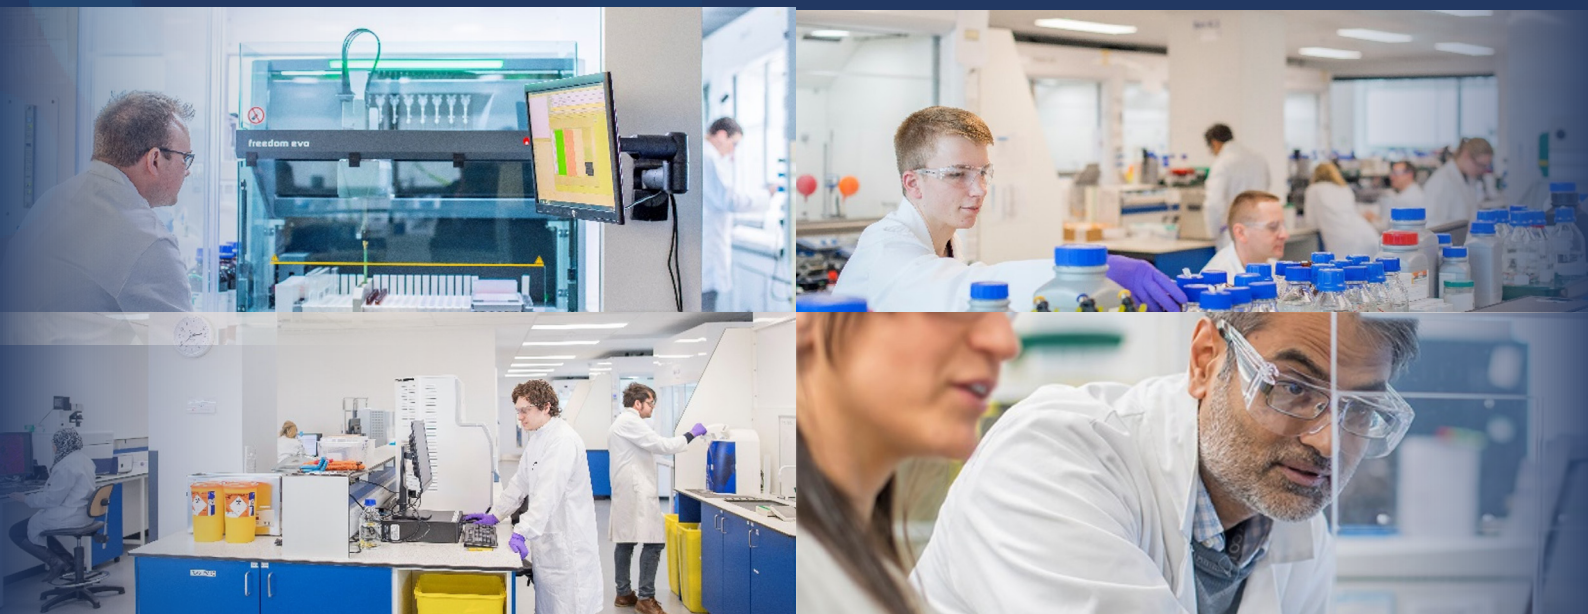

Patent Applications

Sygnature Discovery has been private equity-backed since September 2017.

State-of-the-art, well-equipped laboratories designed for maximum scientific interaction and integrated drug discovery.

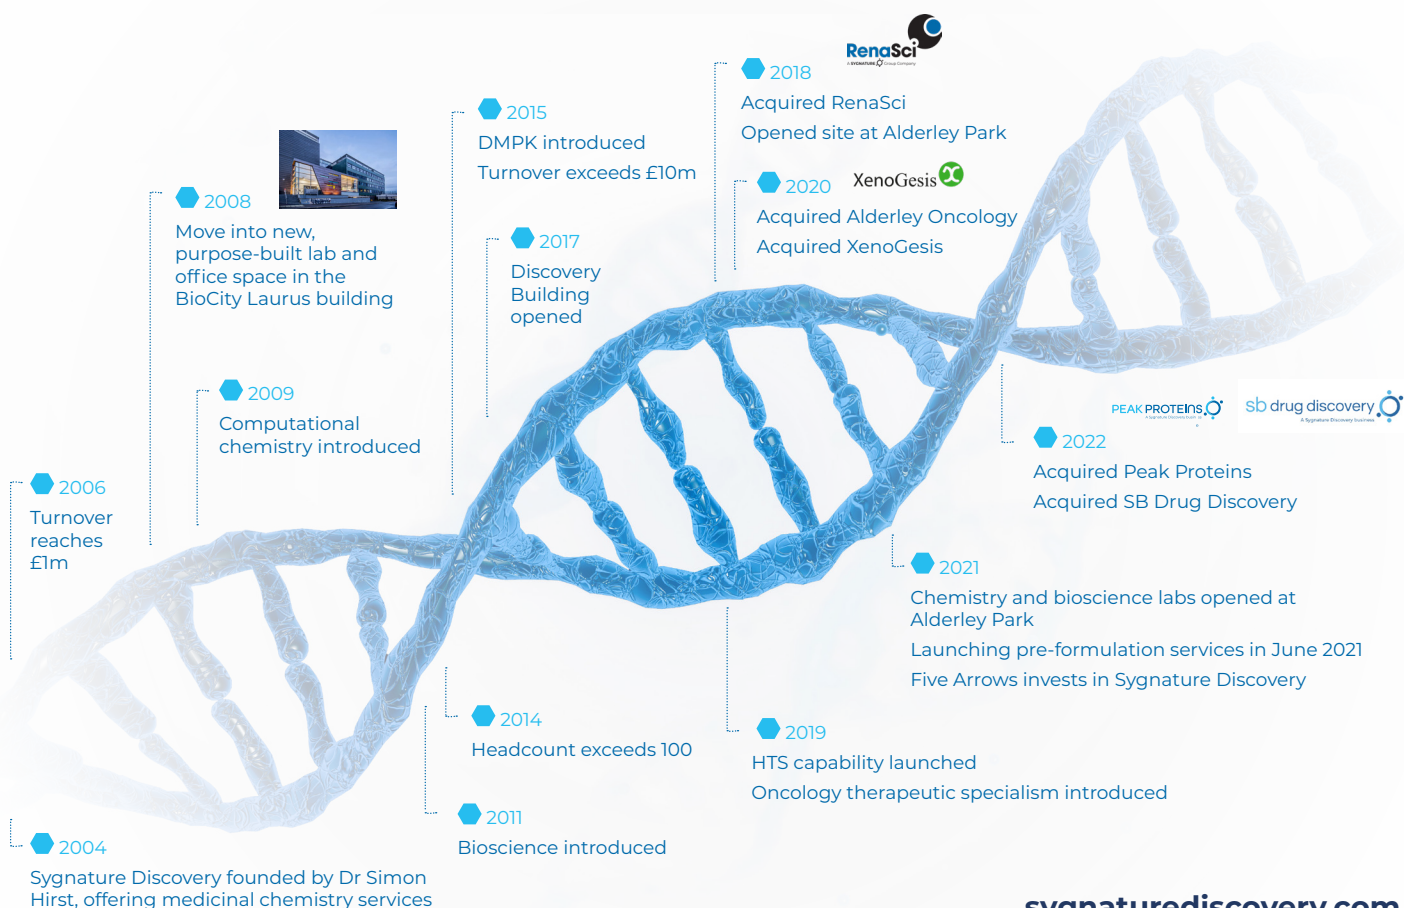

**33% Big Pharma,
50% Biotech, 17% Other**

**86% Revenue from
repeat customers**

**40% US, 40% EU,
20% RoW**

THERAPEUTIC AREAS

Neuroscience
